Dear Colleague,

**Hill's Pet Nutrition Quality Assurance**

Hill's Pet Nutrition products are not irradiated. They are treated to a high temperature during the cooking process which kills infectious organisms and then are preserved. We also give a recommendation about shelf life which can be easily seen on each bag/can of food. We voluntarily follow the guidelines of the Association of American Feed Control Officials with regard to product testing and labeling. If you have further questions, please contact your Hill's sales representative; the Hill's HelpLine on 1800 679 932 or you may call me directly.

Regards,

Dr. Karen L. Johnston BA(Econ), VMD, MRCVS, PhD  
Veterinary Affairs Manager, Hill's Australasia
